

We help you Grow Better

You are not just buying a machine; you are buying a partnership with our team of experts.
We are here to unlock your full potential.

CNC Engraving, CNC Knife Systems, CNC Plastic Cutting Machine, CNC Wood Carving, Cnc Router Machine, Custom Routers, Infinite 2000 Series, Infinite 4000 Series, Infinite 5000 Series, Innovator 4x4, Innovator 5x8, METALWorker 4000 Series, METALWorker 5000 Series, METALWorker 6000 Series, PANELBuilder 5000 Series, etc.

CNC KNIFE SYSTEMS

CNC ROUTER MACHINE

CUSTOM ROUTERS

About Us

Our company, XYZ, is a world-renowned knife system and CNC routers manufacturer. Our routers are constructed and designed at our plant in Burlington, Canada, and are available via a worldwide network of support and sales offices alongside authorized dealers. We specialize in matching equipment to the particular demands and budgets of our customers, with 366,918+ standard machine variants and 30+ years of experience. The success of our clients is critical to ours. Our support and sales teams are dedicated to providing the best service in the business. A prominent producer of waterjet cutting systems and CNC routers in the world. We have installed and built thousands of CNC machines for industries like Metal and Aluminum Cladding, Print and Graphics Finishing, Sign making, Woodworking, Cabinetry, Metal Fabrication, and Plastic Fabrication, Point of Purchase, Foam Packaging, Glass, Solid Surface, and Steel in our 30+ years of experience. 30 Years of Expertise and Innovation Celebrated

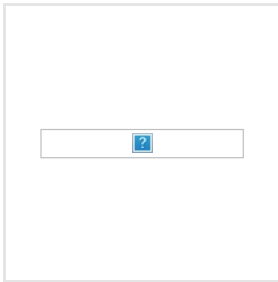

Our CNC Routers were created in 1991 by Gary Harvey and Alf Zeuner in Ontario, Canada. They noticed a market requirement for modular equipment that could be customized to the demands of clients. The architectural cladding and signage sectors were where we discovered our niche. Over the following 30 years, we extended our reach throughout North America, Asia-Pacific, and Europe, alongside launching CNCRouterShop.com, an e-commerce site. Richard Ward established WARDJet in Ohio, USA, in 1995. Richard identified an opportunity to manufacture modular waterjets that could be customized to meet the demands of clients. WARDJet has built a reputation for taking on the most difficult tailored projects. This forward-thinking DNA has drawn customers from the space exploration, automobile, construction, aerospace, and energy industries.

In 2018 and 2017, the Hansen-MacDonald family acquired the principal shareholders of WARDJet and XYZ, respectively. As President, Luke Hansen-MacDonald brought the two teams to establish AAG Tailored Cutting Solutions. The teams were brought together by their shared interest in modular CNC cutting systems. The technical support network of WARDJet was expanded throughout the XYZ worldwide footprint, while the technical depth of XYZ has increased thanks to the unique capabilities of WARDJet. The e-commerce site of the group company was rebuilt and rebranded as CNCShop.com, ushering in a new age of CNC aftermarket distribution that includes both waterjet and router components.

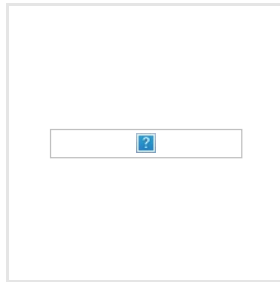

Key Facts

Nature of Business	Manufacturer
Primary Competitive Advantages	knife cutters,aerospace cnc machines,cnc engraver,cnc wood router,woodworking cnc router,cnc router spindle,cnc router,Spares for cnc router,Service cnc router,solid carbide tools
No of Staff	5
Year of Establishment	1980
OEM Service Provided	No
ProductRange	knife cutters,aerospace cnc machines,cnc engraver,cnc wood router,woodworking cnc router,cnc router spindle,cnc router,Spares for cnc router,Service cnc router,solid carbide tools

Our Products

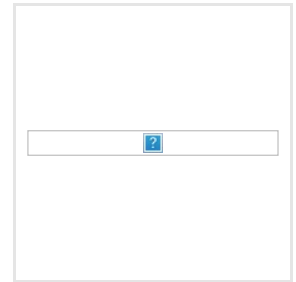

Cnc Router Machine

CNC Wood Carving

CNC Engraving

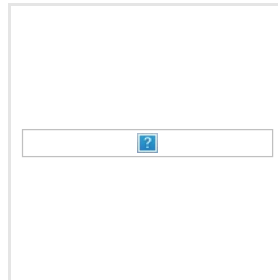

CNC Plastic Cutting Machine

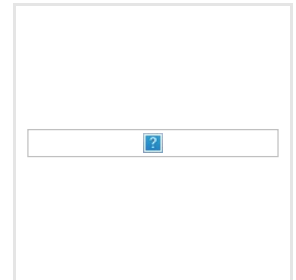

Custom Routers

Infinite 5000 Series
