About Us

Establishing a large customer base is not an easy task for any company. Although there are many companies that have long list of clients but assuring that all their clients would stay with them in the longer run is difficult. Keeping this aspect in view, we, Crown Pipes emerged in the market. The primary objective of our company has always been to achieve maximum client satisfaction and build long lasting relations with our clients. For this reason, we only serve them our qualitative range of HDPE DWC Pipe, Drainage DWC Pipe, Sewage DWC Pipe and more at affordable prices. Moreover, we always remain true to our nature of business as a manufacturer. And this is evident from our manufacturing facility that we keep upgrading on regular time intervals for being in pace with the prevailing technology.

There is no denying the fact that quality has always been the first factor that attracts customers. Therefore, we have hired a team of quality controllers that pays attention to our quality procedures right from the time of base material procurement. We use high density Polyethylene for manufacturing our range of pipes. Apart from this, other raw material are also checked and then sourced to ensure the manufactured goods like HDPE DWC Pipe, Drainage DWC Pipe, Sewage DWC Pipe, etc. are free of defects right from the initial stage itself. Later, these pipes are tested over parameters like corrosion resistivity, chemical resistivity, cracks, etc.
