About Us

Adiras Controls Private Limited is a Pune, Maharashtra-based manufacturer and supplier of different types of reliable quality valves and gear boxes. Major products in our range include Ball Valve, Butterfly Valves including Centric Butterfly Valve, Offset Double Flanged Butterfly Valve, and High Performance Butterfly Valve. We design and manufacture the products in strict compliance with national and international export quality standards. Our company follows a quality manual in accordance with the ISO 9001: 2015 norms and standards. With in-house design and application engineering capability, we develop highly functional valves, gearboxes and manual override to meet our supplying obligations. Today, we are proudly serving a diverse clientele across industries, such as automotive, blast furnace, carbon fibre glass, cement industry, chemical plants, food industry, fertilizer plants and many more.

Adiras Controls Private Limited is led by Mr. Raosaheb Tambe, who has 29 years of domain experience. He boasts of a complete knowledge of design engineering, product development, technical know how, large-scale production as well as manufacturing management. Our management has more than a decade experience of designing and manufacturing different types of valves and had already worked with global manufacturing companies prior to embarking on this entrepreneurial journey. That highly enriched experience accorded our management with outstanding knowledge of the latest manufacturing technology and best industrial practices. With our expertise and domain knowledge, we are confident of serving all the demands of our customers in the present time as well as in the future.
