## About Us

Ultrasonic plastic welding technology is a state-of-the-art welding method utilized for joining thermoplastic parts or automotive components by applying high-frequency vibration. This technology helps to attain homogeneous joint quality without any contamination. Mumbai, Maharashtra (India)-based Ravira Evergreen Ultrasonic Systems Pvt. Ltd. started its operation in 2006 with an aim to utilize this technology to improve welding performance by offering a wide range of ultrasonic plastic welding equipment and other industrial machines.

As a prestigious manufacturer and supplier, this organization is involved in offering a meticulously designed range of products that include Surgical Sewing Machines, Rotary Table Plastic Welder Machines, Label Cutting Machines, Box Welder Machines, etc., to name a few. The provided welding machinery is appreciated for its high output rate, smooth operation, long working life, required safety features, and ease of handling. With a well-equipped production house, this company is expanding its business opportunities under the guidance of Mr. Mahendra (the director). At present, this company possesses one branch to execute all the stages of its operation in a systematic manner.
